EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Response to Amendment

1. Applicants' amendment filed on May 10, 2006, has been fully considered and entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claims 2, 3 and 6-12, line 2, please delete "in Claim" and insert - -in claim- -.

In claim 11, line 2, please delete "as claimed in Claim 1" and insert - - as claimed in claim 13- -.

Reasons for Allowance

3. Claims 2, 3 and 6-14 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest all the limitations recited in claim 13. Specifically, the prior art of record fails to disclose an improved

Art Unit: 2874

structure of a light waveguide device having a backlight module comprising, in sequence a reflector mask; multiple light source; at least one optical waveguide device; multiple optical films and a protector sheet; wherein the optical waveguide is formed to have multiple recesses which accommodate and partially surround each light source by substantially conforming to a curved surface of the light source, the optical waveguide device having an embossed lower surface and an embossed upper surface formed to refract and reflect light from each light source to result in evenly diffused light emanating from the lower diffuser sheet in order to substantially eliminate the dark band formed between adjacent light sources in combination with the other limitations of claim 13.

Claims 2, 3, 6-12 and 14 depend from claim 13.

The examiner agrees with applicants' arguments on pages 7-10 in the remarks accompanying the amendment of May 10, 2006, and fully concurs that neither Abileah nor Bernard reference discloses or suggests a waveguide device having backlight module with all limitations as defined above.

The newly cited reference, Farrell (U.S. Patent 5,143,433) discloses a backlight system having a LCD panel, a diffuse plate and light sources accommodated by curved reflecting surfaces of a reflector body, which are different from a light waveguide device having a backlight module of the claimed invention.

Claims 2, 3 and 6-14 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
